Dear Lisa

Thank you for sharing your LOMP with the team and for your collaborative approach throughout.

The headline feedback is that this is strong , detailed plan.

There were many positives noted which not only included how strong the presentation of the plan and how it hangs together, but the good use of case studies, the strong data driven approach and how the plan shows a good understanding of the local intelligence sources. The team noted how the plan captured learning and how this has influenced the plan which ensures the plan remains relevant and robust. Your plan conveys confidence that your public health system is working together keep your communities safe.

Members of the RPT liked that you have included the battle rhythm and how you collect data and stated that the plan 'inspired confidence that they have a mechanism in place' (in the outbreaks section).

The team welcomed and commended the good use of diagrams for OIRR.

A plan for your team to be really proud of.

BW Judith
